CHICO RIVER ROAD PAVEMENT TREATMENT

Beginning Tuesday morning, October 10, at 7:00 a.m., American Paving Systems will be performing road work on Chico River Road between Miller Avenue and the City of Chico Water Pollution Control Plant. In general, the work consists of resurfacing the roadways with a slurry seal pavement treatment. This is the final phase of the Chico River Road Trunk Line Installation Project, which replaced 3.4 miles of existing sewer trunk line. Road resurfacing operations are expected to be completed and the roads reopened to through traffic by Wednesday evening, October 11.

Local access throughout the project construction zone will be subject to traffic controls and temporary delays in order to accommodate construction crews and equipment. Drivers are encouraged to build extra time into their schedule or plan alternate routes to avoid the project area if possible. The City acknowledges this temporary inconvenience and appreciates your cooperation and patience during this time. Residents and businesses are assured access to their properties at all times.

For questions or concerns regarding this project, please call Construction Inspector Matt Gilbert at 530-624-1501 or e-mail at Matt.gilbert@chicoca.gov
